

Protective solutions

FU-130

Ideal solution for small scale CBRN protection in tents, field laboratories, air locks or decontamination areas.

This small portable NBC-filter unit is designed to maintain overpressure and bring in filtrated fresh air for up to 15 persons in one small shelter or "sealed room".

To maintain the filtration capacity of the NBC-filter the unit is delivered in a sealed package and shall not be opened while not in use.

Main characteristics

Air flow: 130 m³ /h

Overpressure capacity: 100 Pa

NBC - filter: Temet

Power supply: 28 VDC

Power consumption: 300W

Weight: 22 kg
